# **Admin Only**

Go to Admin Dashboard/Settings/Privacy Settings Select the Settings link (top right)

Privacy Settings		
		Telaults - Settings
Ads		~
Events	>	~

Tick the Enable Create New Privacy Group.

Now go to your profile.

### **Admin and Members**

Dolphin has a mind of it's own. The following screen MAY appear when you open the site, but it also MAY not .

If it doesn't, Click your Icon (top right)and select Account

You should now see the screen at the top right of this page.

Click the Account Home link and select Privacy Groups.

Privad	cy Groups 🗸
MY PRIVACY GRO	UPS
Select all	DELETE
CREATE A NEW P	RIVACY GROUP
Title xxxxxxx	
Extends Members	

Enter the name of your new group and select who this group extends to. I'm not sure what this does, but I assume that if you select friends, only friends can be selected for this new group. You'll need to experiment with this or seek additional help.

#### Create the group.

You now have to enter who will be in this elite group.

### Click the Plus Sign (Above)

ADD MEMBERS	×
Keyword	
SEARCH	
· · · · ·	
Select all	
and the second se	

The above screen will appear.

Enter a keyword or even a single letter and click Search. A list of suitable names will appear.

Select the name and click the Add button.

You now have one person in your group.

## **Your Profile**

•	Info	Friends	Photos	Videos	Ads	Groups	Events
Contraction of the second	Q 0	ESCRIPTION	- ieur person t	esting this tes	t program.		

Go to your profile. You will see a little yellow key on the top left of each block. This also applies to profile field blocks.

Click the Yellow key in any block you only want your elite privacy group to see.

Be warned! Only your elite group will see the block. Other members will see nothing. In a nutshell you are about to destroy the look and feel of your profile for most members.

Click the privacy setting.
