

# **Joomla Component Guide**

# Manage the Joomla Component

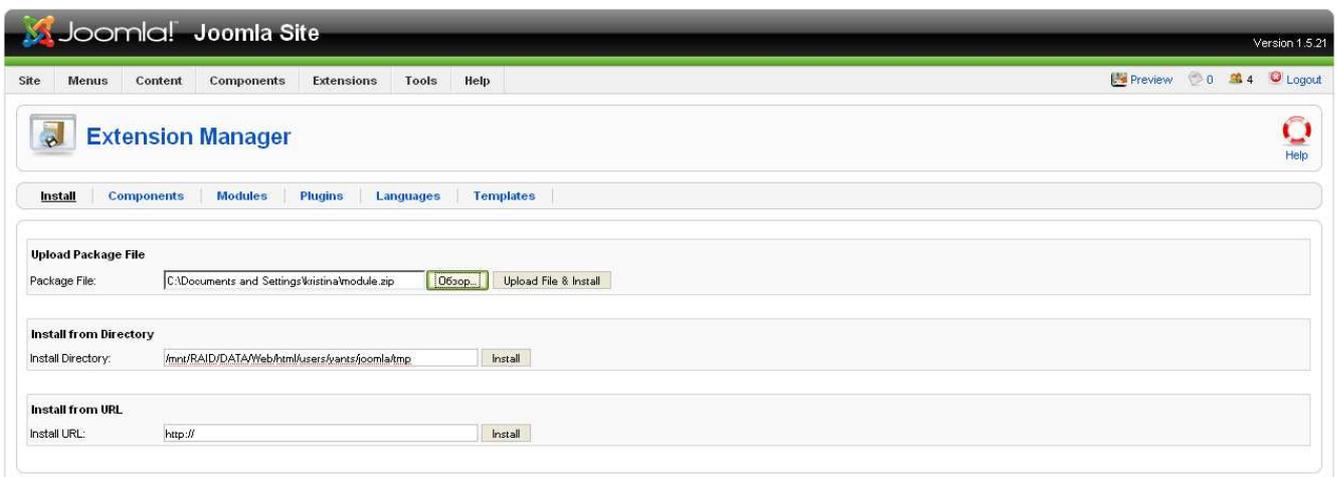

## Install Joomla Component

After you've downloaded the archive with the Joomla Component, please follow these steps to complete installation of your Joomla Component:

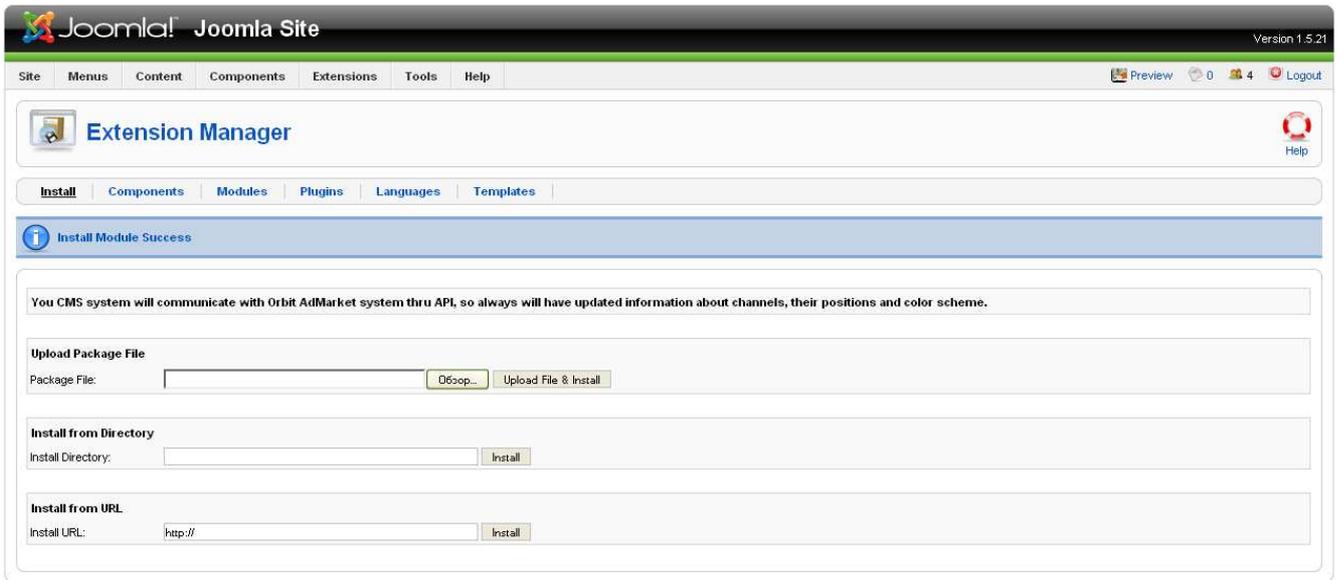

1. Unpack the two files "module.zip" and "component.zip" from the archive into a place that's convenient for you. These are the installation packages for the component and module.
2. To install the packages into your Content Management System go to the Joomla administrator's panel and select "Extensions → Install/Uninstall" menu.

3. Install the module, press the "Browse" button in the menu, and in the window that opens enter the path for the file "module.zip".

4. Click on the "Upload File & Install" button

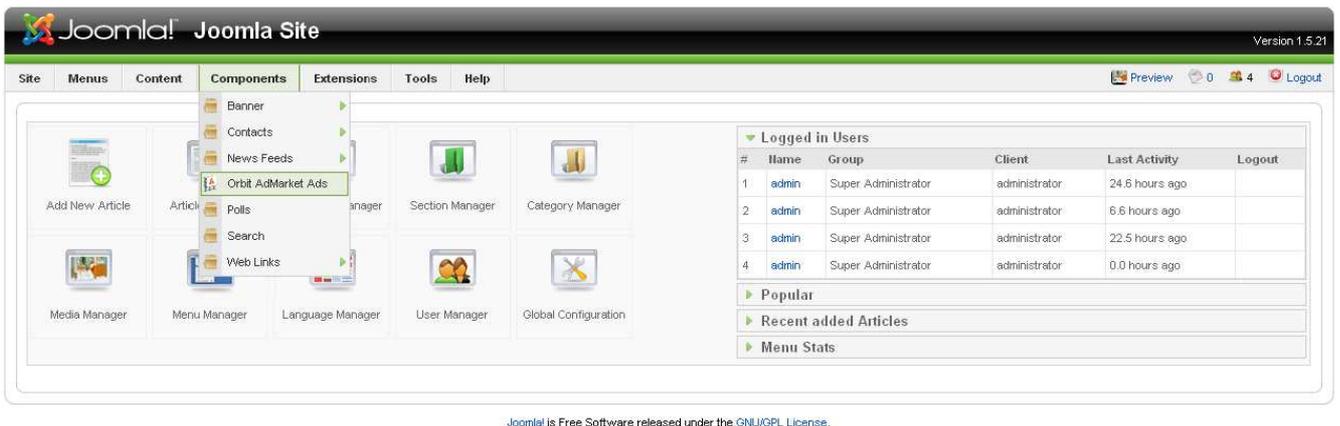

5. Repeat the steps above to install the component.

That's it! The component and module have been successfully installed into your system.

## Add New Channels Into Your Joomla CMS

It's a cinch to include ads on your Joomla based websites, just follow these steps:

1. Go to the "Components → <%SITE\_NAME%> Ads" menu.

2. Click "Create New Channel".

ID	Channel Name	Status	Position	Dimension
92	3.ru Channel	✖	left	468x60
90	Middle Bottom Banner	✖	left	234x60
91	Content Middle Banner	✔	footer	728x90

Joomla! is Free Software released under the GNU/GPL License.

- In the form that opens, select a channel and color scheme for the channel from the list. Retain your changes by clicking the "Save" button. The system will automatically create a new component in the Joomla system using the settings you've selected.

Joomla! is Free Software released under the GNU/GPL License.

- You can adjust the component to display your ad channels according to your tastes.

**Channel Saved!**

**Details**

Module Type: **mod\_orbitscripts\_ads**

Title: 3.ru Channel

Show Title:  No  Yes

Enabled:  No  Yes

Position: left

Order: 0:3.ru Channel

Description: You CMS system will communicate with Orbit AdMarket system thru API, so always will have updated information about channels, their positions and color scheme.

**Parameters**

Module Class Suffix

Module CS

**Module Class Suffix**  
A suffix to be applied to the CSS class of the Module. This allows for individual Module styling.

**Menu Assignment**

Menus:  All  None  Select Menu Item(s) from the List

Menu Selection: mainmenu Home

Joomla! is Free Software released under the GNU/GPL License.

That's you have it! The channel you've selected will be displayed using the components you've created.

## Changing Settings

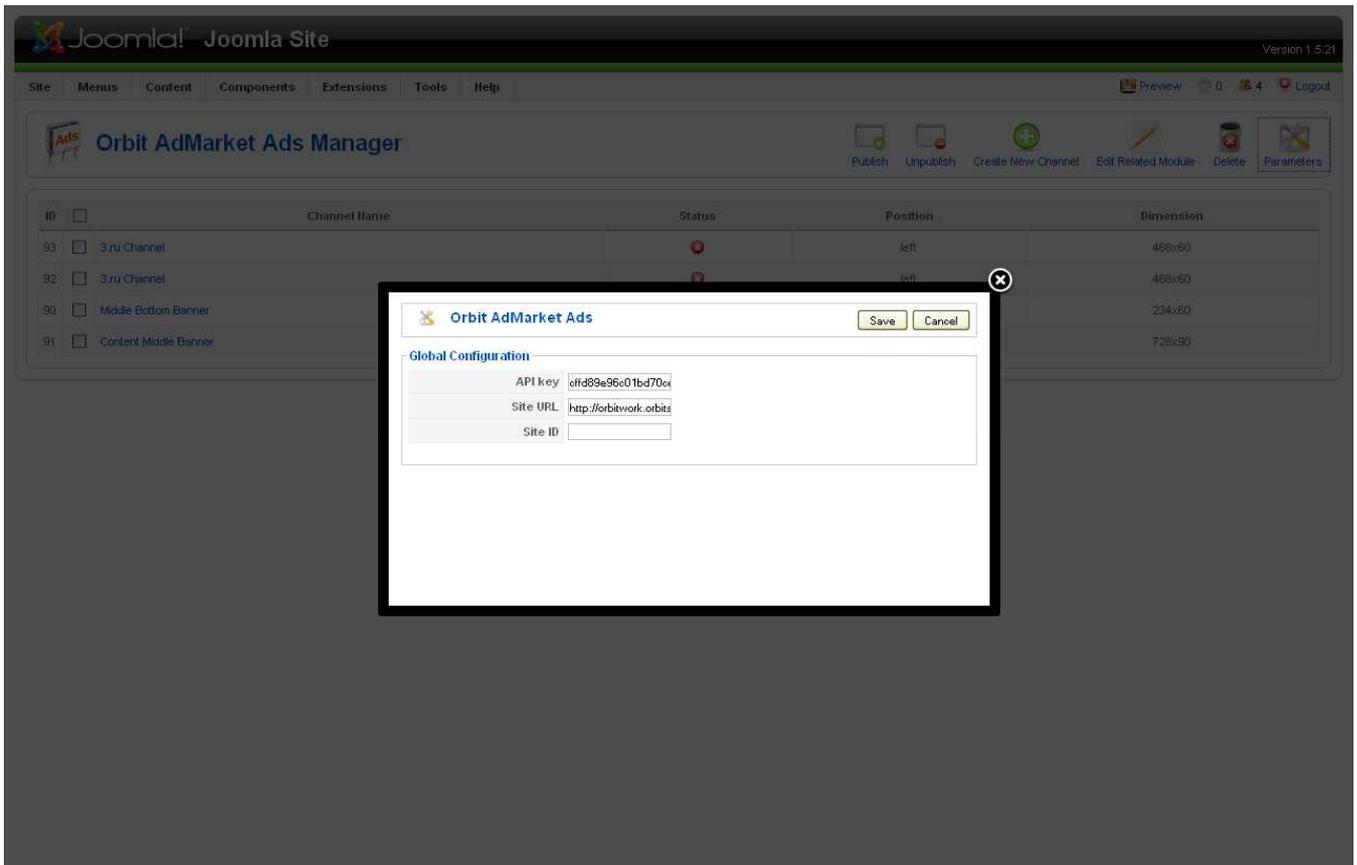

Sometimes it will be necessary to change the settings of the component; for instance, when the address of an ad server changes, you change an API key etc. To avoid reinstallation of the component each time we've created a settings configuration interface.

1. Go to "Components → <%SITE\_NAME%> Ads". Click the "Preferences" button.

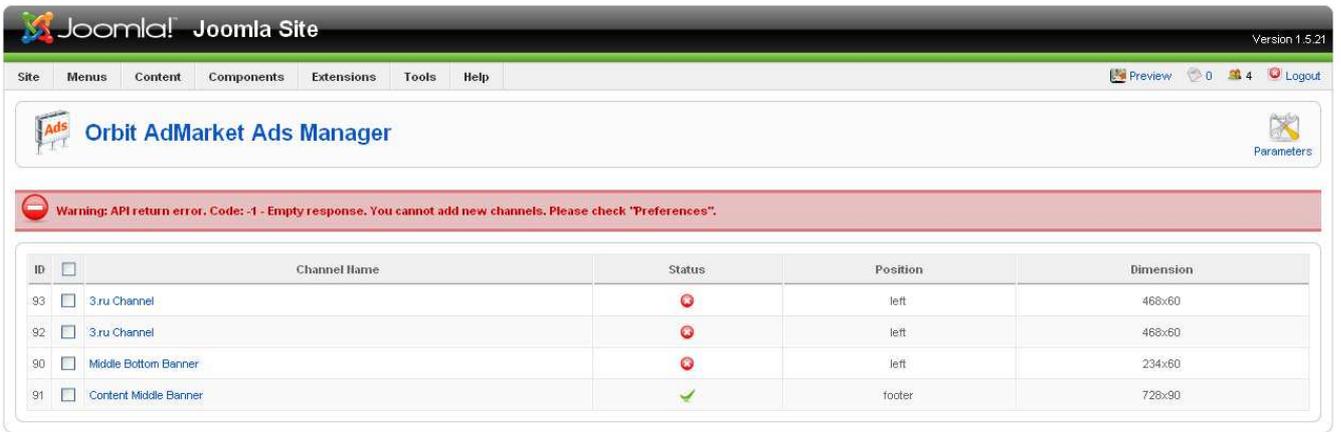

Joomla! is Free Software released under the GNU/GPL License.

2. In the menu that opens, you can enter your new API key, change the address of an ad server or alter a website id.

3. To finish, save your changes and refresh the page.

If you should happen to make a mistake when setting a parameter, a notification message with a code and error description will appear. You won't be able to add new components until the settings error is removed.

The screenshot shows the Joomla! Admin Interface for the Orbit AdMarket Ads Manager. At the top, there is a navigation menu with options: Site, Menus, Content, Components, Extensions, Tools, and Help. The version number 1.5.21 is displayed in the top right corner. Below the navigation menu, the page title is "Orbit AdMarket Ads Manager" with a "Parameters" link. A red warning message is displayed: "Warning: API return error. Code: -1 - Empty response. You cannot add new channels. Please check 'Preferences'". Below the warning, there is a table with the following data:

ID	Channel Name	Status	Position	Dimension
93	3.ru Channel	✘	left	468x60
92	3.ru Channel	✘	left	468x60
90	Middle Bottom Banner	✘	left	234x60
91	Content Middle Banner	✔	footer	728x90

At the bottom of the page, there is a small text: "Joomla! is Free Software released under the GNU/GPL License."
