Software requirements

- **PHP: 5.4.16 - WARNING** (your PHP version is probably outdated, upgrade to the latest 5.6.9 maybe required)
 - allow_url_fopen = On - **OK**
 - allow_url_include = Off - **OK**
 - magic_quotes_gpc = Off - **OK**
 - memory_limit = 134217728 - **OK**
 - post_max_size = 54525952 - **OK**
 - upload_max_filesize = 52428800 - **OK**
 - register_globals = Off - **OK**
 - safe_mode = Off - **OK**
 - disable_functions = - **OK**
 - php module: curl = curl - **OK**
 - php module: gd = gd - **OK**
 - php module: mbstring = mbstring - **OK**
 - php module: xsl = xsl - **OK**
 - php module: json = json - **OK**
 - php module: openssl = openssl - **OK**
 - php module: zip = zip - **OK**
 - php module: ftp = ftp - **OK**
- **MySQL: 5.5.41-MariaDB - OK**
- **Web-server: Apache/2.4.6 (CentOS) PHP/5.4.16**
 - rewrite_module - **OK**
- **OS: Linux localhost.localdomain 3.10.0-229.4.2.el7.x86_64 #1 SMP Wed May 13 10:06:09 UTC 2015 x86_64**

Hardware requirements

Hardware requirements can not be determined automatically - [manual server audit](#) may be required.

Site setup

- **Dolphin version = 7.1.5 - OK**
- **files and folders permissions**
Please [click here](#) to find out if dolphin permissions are correct.
- **ffmpeg**

```
ffmpeg version 0.10 Copyright (c) 2000-2012 the FFmpeg developers
built on Feb  2 2012 01:28:23 with gcc 4.4.3
configuration: --extra-ldflags=-static --extra-cflags=-static --enable-stati
libavutil      51. 34.101 / 51. 34.101
libavcodec     53. 60.100 / 53. 60.100
libavformat    53. 31.100 / 53. 31.100
libavdevice    53.  4.100 / 53.  4.100
libavfilter     2. 60.100 /  2. 60.100
libswscale      2.  1.100 /  2.  1.100
libswresample  0.  6.100 /  0.  6.100
libpostproc   52.  0.100 / 52.  0.100
Hyper fast Audio and Video encoder
usage: ffmpeg [options] [[infile options] -i infile]... {[outfile options] out
Use -h to get full help or, even better, run 'man ffmpeg'
```

- if you don't know if output is correct then [manual server audit](#) may be required.
- **mail sending** - [click here](#) to send test email to xsenin@gmail.com
- **cronjobs**

```
no crontab for apache
```

- if you are unsure if output is correct then [manual server audit](#) may be required.

- **media server**
Please follow [this link](#) to check media server settings. Also you can try video chat - if video chat is working then most probably that flash media server is working correctly, however it doesn't guarantee that all other flash media server application will work.
- **forums**
Please follow [this link](#) to check if forum is functioning properly. If it is working but '[L]' signs are displayed everywhere, then you need to [compile language file](#) (you maybe be need to compile language file separately for every language and template you have).

Site optimization

- **PHP:**
 - **PHP accelerator = XCache - OK**
 - **PHP setup = apache2handler - OK**
- **MySQL:**
 - **key_buffer_size = 134217728 - OK**
 - **query_cache_limit = 1048576 - OK**
 - **query_cache_size = 33554432 - OK**
 - **query_cache_type = ON - OK**
 - **max_heap_table_size = 16777216 - OK**
 - **tmp_table_size = 16777216 - OK**
 - **thread_cache_size = 128 - OK**
- **Web-server:**
 - **User-side caching for static conten** = [click here to check it in Google Page Speed](#)
If it is not enabled then please consider implement this optimization, since it improve perceived site speed and save the bandwidth, refer to [this tutorial](#) on how to do this.
To apply this optimization you need to have **expires_module** Apache module - **OK**
 - **Server-side content compression** = can be checked **manually** or in "Page Speed" tool build-in into browser.
If it is not enabled then please consider implement this optimization, since it improve perceived site speed and save the bandwidth, refer to [this tutorial](#) on how to do this.
To apply this optimization you need to have **deflate_module** Apache module - **OK**
- **Dolphin:**
 - **DB cache = On (File based cache engine) - OK**
 - **Page blocks cache = On (File based cache engine) - OK**
 - **Member menu cache = On (File based cache engine) - OK**
 - **Templates Cache = On (FileHtml based cache engine) - OK**
 - **CSS files cache = On - OK**
 - **JS files cache = On - OK**
 - **Compression for CSS/JS cache = On - OK**

Manual Server Audit

Some things can not be determined automatically, manual server audit is required to check it. If you don't know how to do it by yourself you can submit [BoonEx Server Audit Request](#).

RECOMMENDED HOSTING

[Recommended Hosting](#)

90% of configuration and installation issues result from incorrect hosting setup. BoonEx constantly works with a number of quality hosts and we recommend the best ones. Moreover, BoonEx customers generally receive better deals and accounts tailored specifically for Dolphin.
