

How logout dialog appears on my site.

Top section is incomplete.

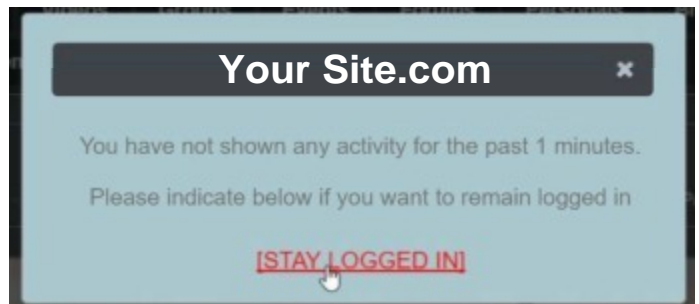

I suspect it's meant to look like this.

Is there wording missing from the black box?

A Suggestion For A Future Update

With so many unwanted popups appearing these days, it would be nice if the black box contained the site name to let users know it's a site message.

This may be best achieved by having a field in Settings:

A screenshot of an administration settings page. The title is "ADMINISTRATION". It contains several form fields: "Heading" with the value "Your Site.com", "Number Of Idle Minutes Before Popup Reminder Is Triggered" with the value "1", "Number Of Idle Minutes Before Logout Is Triggered" with the value "10", and "Max. Number Of Logged Out Records To Store In Database Log" with the value "1000". There is also a checkbox labeled "Auto Logout Admin Profile Also" which is checked. A blue "SAVE" button is located at the bottom right.
